

On the Subject of Hexamazes

Dammit Jim, I'm a doctor, not a honeybee!

Find the submaze of side length 4 with matching markings. The submaze on the bomb (and its markings) may be a rotation of the maze as it is shown above.

Refer to the color chart in the top left and navigate the pawn out of the submaze through an exit on the side indicated by the pawn's color.

Warning: Do not cross the lines shown in the maze. These lines are invisible on the bomb.
